excerpt from history of philosophy vol 1 the history of philosophy as a historical science the history of philosophy is both a science history and philosophy it links two different fields of endeavor as a science of history it seeks to acquaint us with the wealth of thought bequeathed by the philosophers of the past and of the present for this reason it provides us with whatever is known of their lives their works and their systems in so doing it not only portrays what once actually existed but also by developing the notions and the thoughts that have been or are current seeks to make accessible to us a knowledge of this rich heritage this is accomplished by examining the origins of both the men and their works by placing them in their proper relation to greater spheres of thought by correlating them with other contributions and with the all pervading spiritual and cultural currents among peoples of various eras and finally by unfolding for us the fundamental suppositions and the ultimate assumptions from which the concepts the problems and the teachings of philosophy have originally sprung as from a matrix should the history of philosophy attempt to present things as they were in reality it would by that very fact determine for itself a definite method on the one hand a continuous use of sources and on the other a demand for objectivity or freedom from bias the use of sources is a special achievement of the modern science of history antiquity and the middle ages had to be content with only second hand reports today however we not only consult the sources but we also ascertain with critical and painstaking diligence whether the writings which appear under the name of a certain philosopher actually stem from him whether his manuscripts have been preserved without falsification and in which period of his creative ability they were written textual criticism and chronology the history of philosophy is therefore an introduction to the works of the philosophers themselves about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
